The scanner, on one card

1. **Scan the RACK label**
2. **Scan the PALLET label**
3. **Count. Type the QUANTITY**
4. **A comment if one fits — or wait**

Sign on: scan the team card, then every badge, then Sign on & load list.

OFFLINE at the top? Keep counting. Lines send themselves when the signal is back.

The five rules

- Count what is really there — never the report.
- Every pallet in the spot, every spot in your aisle.
- Nothing in the spot: Bin is EMPTY.
- Wrong entry: Back. Wrong line saved: History → Void.
- Finished the aisle? Tell your supervisor.

The buttons

Bin is EMPTY	nothing in the spot
This pallet has more than one label	one skid, two labels
Label will not scan	type it, or count it with no label
Report a problem	damage, a blocked spot
SOS — I need help	now, not later
Start second counts	spots to count again
Sign off this scanner	break or end of shift

- Nothing in the spot: Bin is EMPTY.
- Wrong entry: Back. Wrong line saved: History → Void.
- Finished the aisle? Tell your supervisor.

The buttons

Bin is EMPTY	nothing in the spot
This pallet has more than one label	one skid, two labels
Label will not scan	type it, or count it with no label
Report a problem	damage, a blocked spot
SOS — I need help	now, not later
Start second counts	spots to count again
Sign off this scanner	break or end of shift

The scanner, on one card

1. **Scan the RACK label**
2. **Scan the PALLET label**
3. **Count. Type the QUANTITY**
4. **A comment if one fits — or wait**

Sign on: scan the team card, then every badge, then Sign on & load list.

OFFLINE at the top? Keep counting. Lines send themselves when the signal is back.

The five rules

- Count what is really there — never the report.
- Every pallet in the spot, every spot in your aisle.
- Nothing in the spot: Bin is EMPTY.
- Wrong entry: Back. Wrong line saved: History → Void.
- Finished the aisle? Tell your supervisor.
