on, and **Show on the scanners**.

When the teams count

ON THE FLOOR	WHERE YOU SEE IT	WHAT YOU PRESS
A team says *every bin has a count*	**Team plan**: the aisle's bar is full	**done** on that aisle. Their next aisle comes up on their scanner by itself
A team is waiting on racking another team is in	**Team plan**: *Held · team …*	Nothing: it starts when the racking is free. **start** to send them in anyway
SOS on a scanner	**Alerts**: a loud alert with team, aisle and last bin	**I am on it** — the scanner says who has seen it — and go
A scanner has gone quiet	**Alerts**: the team, and how long	**On break**, **Lunch**, or **Seen — I am on it**
You need a team somewhere	**Alerts → Message the floor**	Pick a team or everybody, type it, send. You see when they tap *Got it*
A first count disagrees with the report	**Second counts**: raised by itself, for another team	Nothing: teams pick them up from **Start second counts**
You want a spot counted again	**Second counts**: type the bin	**Request second count**, with a team if you want one
A torn label, no label, a rack label that will not scan	**Reports → Fix list**: *Labels to replace*	Print one, put it on, then **Label printed & on the pallet** (or **on the rack**)
Damage, a blocked spot	**Reports → Fix list**: *Damage*, *Blocked bins to go back to*	Sort it, then **Fixed**
A pallet not on the list, in the wrong bin, missing	**Reports → Pallet report**: *NOT IN MASTER*, *WRONG BIN*, *MISSING*	Nothing on the floor: second counts and adjustments take it from there

Before the first team

- **Dashboard**: the count picked at the top. **Sign-off plan**: each team's first aisle as *counting now* or *next*. **Crew board** (top right of the Dashboard) goes on the floor TV.
- Every scanner charged, on the Wi-Fi, at the sign-on screen. Each crew has its **team card** and their **badges**.
- **Team plan**: every aisle counted is marked **done**; anything half done stays queued for the next shift.
- Settings → Count setup → **Guided by the plan, bin by bin** is on, and **Show on the scanners**.
- **Second counts**: the open number. Hand what is left to the next shift's second-count team.
- **Reports → Fix list**: labels still to replace, so the next shift's counters are not stopped by the same torn label.

When the teams count

ON THE FLOOR	WHERE YOU SEE IT	WHAT YOU PRESS
A team says *every bin has a count*	**Team plan**: the aisle's bar is full	**done** on that aisle. Their next aisle comes up on their scanner by itself
A team is waiting on racking another team is in	**Team plan**: *Held - team*	Nothing: it starts when the racking is free. **start** to send them in anyway
SOS on a scanner	**Alerts**: a loud alert with team, aisle and last bin	**I am on it** — the scanner says who has seen it — and go
A scanner has gone quiet	**Alerts**: the team, and how long	**On break**, **Lunch**, or **Seen — I am on it**
You need a team somewhere	**Alerts → Message the floor**	Pick a team or everybody, type it, send. You see when they tap *Got it*
A first count disagrees with the report	**Second counts**: raised by itself, for another team	Nothing: teams pick them up from **Start second counts**
You want a spot counted again	**Second counts**: type the bin	**Request second count**, with a team if you want one
A torn label, no label, a rack label that will not scan	**Reports → Fix list**: *Labels to replace*	Print one, put it on, then **Label printed & on the pallet** (or **on the rack**)
Damage, a blocked spot	**Reports → Fix list**: *Damage*, *Blocked bins to go back to*	Sort it, then **Fixed**
A pallet not on the list, in the wrong bin, missing	**Reports → Pallet report**: *NOT IN MASTER*, *WRONG BIN*, *MISSING*	Nothing on the floor: second counts and adjustments take it from there

- Do not mark an aisle **done** before the team says every bin has a count: the expected pallets nobody saw become second counts.
- Do not tell a counter what the first count was on a second count. It is blind on purpose.
- Do not let a crew carry on as another team's number. The next crew signs on with its own card.

Printed October 27, 2026

At the end of a shift

- Every crew signs off on its scanner: **Sign off this scanner**, and the scanner on its charger. A scanner with lines still queued warns before it signs off — walk it to the Wi-Fi.
- **Team plan**: every aisle counted is marked **done**; anything half done stays queued for the next shift.
- **Second counts**: the open number. Hand what is left to the next shift's second-count team.
- **Reports → Fix list**: labels still to replace, so the next shift's counters are not stopped by the same torn label.

Do not

- Do not mark an aisle **done** before the team says every bin has a count: the expected pallets nobody saw become second counts.
- Do not tell a counter what the first count was on a second count. It is blind on purpose.
- Do not let a crew carry on as another team's number. The next crew signs on with its own card.
