STANDARD OPERATING PROCEDURE · BY ROLE

The ERP upload, an aisle at a time how it works

For: Inventory control · Full Harvest Inventory

A count goes into the ERP aisle by aisle, as the aisles are finished. For each aisle you download an Excel sheet, put its lines into the ERP, write *yes* against each line as it goes in, and upload the sheet back — so the app knows what is in the ERP, nothing is keyed twice, and nothing is missed.

Printed October 22, 2026

Contents

1 — In one minute 3

2 — Pick an aisle that is ready 4

3 — Download the aisle 5

4 — Put it into the ERP and fill in the sheet 6

5 — Upload the sheet back 7

6 — A line counted again after it went in 8

7 — When something is not right 9

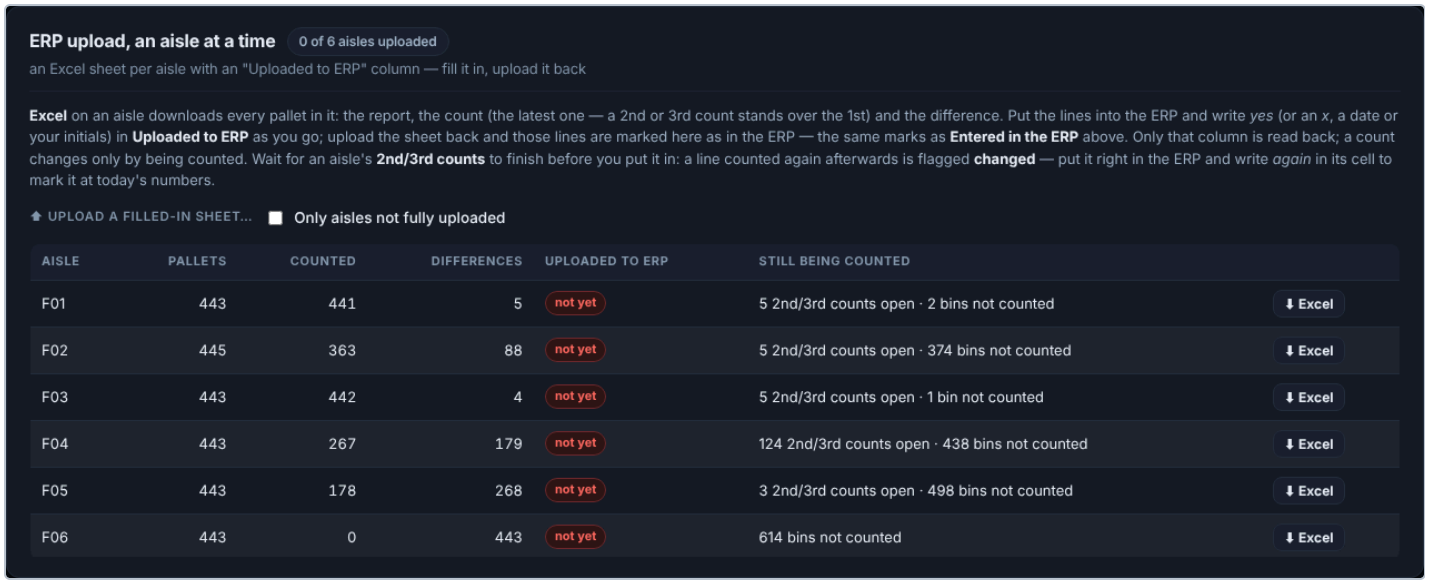

1 — In one minute

1. **Dashboard → Adjustments → ERP upload, an aisle at a time** (the same card is under **Inventory Control → Adjustments**). Pick the count at the top.
2. Pick an aisle whose **second and third counts are finished**.
3. **⬇ Excel** on the aisle: every pallet in it, with an **Uploaded to ERP** column.
4. Put the lines into the ERP. Write **yes** in *Uploaded to ERP* as each goes in.
5. **⬆ Upload a filled-in sheet…** — those lines are marked as in the ERP.
6. Next aisle. **Only aisles not fully uploaded** shows what is left.

The sheet only marks lines. **It never changes a count.**

2 — Pick an aisle that is ready

The card has a row for every aisle on the count:

Every aisle: how much is counted, how much differs, how much is in the ERP, and what is still being counted.

COLUMN	WHAT IT IS
Pallets, Counted	The pallets in the aisle, and how many have been counted
Differences	How many differ from the report
Uploaded to ERP	*not yet*, *12 of 40* or *all in the ERP* — and *N changed since* (section 6)
Still being counted	Open **2nd/3rd counts** and **bins not counted** — or *done*

Start an aisle once "Still being counted" is clear. A second or third count can still change its numbers.

3 — Download the aisle

Press ⬇ **Excel** on the aisle's row. The workbook is named for the count and the aisle; its first sheet is the aisle:

Q3-2026-wall-to-wall-aisle-F01-for-ERP-2026-10-22.xlsx

	A	B	C	D	E	F	G	H	I	J	K	L
1	Bin	Pallet	Item	Report quantity	Counted quantity	Adjustment	Result	Count	Uploaded to ERP	Uploaded by	Uploaded at	Changed since uploaded
2	F01A001	F01-001	SKU-4120	31	31	0	Matches	1st	yes			
3	F01A002	F01-002	SKU-4180	38	38	0	Matches	1st	yes			
4	F01A003	F01-003	SKU-2210	45	45	0	Matches	1st	yes			
5	F01A003	F01-004	SKU-2240	52	52	0	Matches	1st	yes			
6	F01A004	F01-005	SKU-2240	59	59	0	Matches	1st	yes			
7	F01A004	F01-006	SKU-6610	26	26	0	Matches	1st	yes			
8	F01A004	F01-007	SKU-6640	33	33	0	Matches	1st	yes			
9	F01A005	F01-008	SKU-6610	40	7	-33	Quantity differs	2nd				
10	F01A006	F01-009	SKU-6640	47	47	0	Matches	1st				
11	F01A007	F01-010	SKU-3310	54	54	0	Matches	1st				
12	F01A008	F01-011	SKU-3350	61	61	0	Matches	1st				
13	F01A008	F01-012	SKU-8810	28	28	0	Matches	1st				

An aisle's sheet, part way through: the lines already in the ERP have yes in Uploaded to ERP (green here).

COLUMN	WHAT IT IS
Bin, Pallet, Item, Lot…	The line
Report quantity	What the inventory report said
Counted quantity	What the count found — the **latest** count (a 2nd or 3rd count stands over the 1st). Blank when the pallet was not found
Adjustment	Counted less report: what the ERP has to move. 0 on a match
Result, Count	*Matches*, *Quantity differs*, *Not found*…; and whether the number is the 1st, 2nd or 3rd count
Uploaded to ERP	**The one column you fill in**
Uploaded by, Uploaded at	Filled in by the app for lines already marked
Changed since uploaded	*was 36*: counted again after it went into the ERP

Every pallet in the aisle is on the sheet, matches included.

4 — Put it into the ERP and fill in the sheet

Work down the sheet. As each line goes into the ERP, write in its **Uploaded to ERP** cell:

WRITE	MEANS
yes — or **x**, ✓, a date, your initials	In the ERP
no	Take the mark off
(blank)	Leave it as it is
again — or **updated**, **re-entered**	Counted again after it went in, and put right in the ERP since (section 6)

Change nothing else on the sheet. Save it — Excel format is fine. You can upload part of an aisle and finish it later: the next download shows what is already marked.

5 — Upload the sheet back

1. **⬆ Upload a filled-in sheet…** and pick the file.
2. The message says how many lines were marked, how many taken off, how many were already marked, and how many were left blank.
3. The aisle's row moves on — *28 of 40*, then *all in the ERP*.

After the upload: the aisle reads all in the ERP.

Only aisles not fully uploaded hides the aisles that are done.

6 — A line counted again after it went in

If a second or third count lands after a line went into the ERP, the ERP holds the old number. The app shows it: **N changed since** on the aisle's row, and **was …** in *Changed since uploaded* on the sheet.

1. Download the aisle again and find the lines with *Changed since uploaded*.
2. Correct them in the ERP to the new **Counted quantity** / **Adjustment**.
3. Write **again** in their *Uploaded to ERP* cell and upload. They are no longer *changed*.

A plain *yes* on a line that is already marked does not clear *changed* — on purpose, so an old sheet uploaded twice cannot hide a change.

7 — When something is not right

YOU SEE	WHAT IT MEANS	WHAT TO DO
the file has no "In ERP" or "Uploaded to ERP" column	Not the app's sheet, or the column was renamed or deleted	Download the aisle again and fill in that column
Not on this count, ignored: …	The sheet is from another count	Check the count picked at the top
An aisle stays at *12 of 40*	Only those lines had *yes*	Fill in the rest and upload again
N changed since	Counted again after it went in	Section 6
Still being counted will not clear	A second or third count is open, or a bin was never counted	Ask the floor supervisor to finish the aisle
The card is not on your dashboard	Your login does not have it	Ask an admin
